

Different Lamp for Different Area 不同灯型合乎不同空间

After got to know about Yan Yee's need, the person in charge of the store, Bryan Liew brought Yan Yee for a tour in the store to choose the lamp she liked while explaining the features of each lamp to her. The lamp nowadays is not only for lighting purpose, but also has other features such as energy saving and durability. Bryan also explained to Yan Yee on how to choose and use these different lightings. For example, fluorescent light and LED light is more energy saving and durable, which is suitable for long period of usage but common light bulb is not suitable as it will shorten the lifespan of the bulb. Besides, cleaning and maintaining the lighting is also important as different lightings have different ways of cleaning. For example, crystal lighting is suitable to be cleaned by water while vacuum cleaner can be used to clean cover lighting.

Different types of lamp can create different effects, lightings and ambiances. Besides supplying various types of lamp, Achiever Lighting Sdn. Bhd has also brought in Skylift Motor technology specially for hanging lighting. In the past, professional technician is needed for the maintenance and repairing of this type of lighting. With Skylift Motor, the height of the lighting can be adjusted like a lift. Therefore, problems such as cleaning or changing the light bulb can be solved easily by own self without the need to hire a technician.

在了解了恩仪的需求之后，负责人Bryan Liew便带着恩仪在店里选择她心目中的灯饰，并在旁讲解各种灯饰的特点。现今灯饰已不再如传统般仅作照明功用，除了基本照明之外，在功能方面还有许多讲究，例如其省电及耐用性。Bryan细心地为恩仪讲解如何选择及应用各类照明用具，例如光管和LED灯泡都较为省电且耐用，适于长时间使用。而一般的灯泡不宜长时间亮着，否则将快速消耗其使用寿命。另外，在清洁和保养灯饰方面亦是一门学问，不同类型的灯饰需要用不同的方法来清理。例如水晶灯宜用清水擦拭，而布罩灯则可利用手提式吸尘器来清理灯罩。

不同的灯型可营造出不同的效果、灯光及氛围，除了大量不同类型的灯饰供应之外，Achiever Lighting Sdn.Bhd.现在也引入Skylift Motor技术，此技术是特别设计给高空悬挂的灯饰。在以往，这类灯饰如果需要保养、维修甚至换一个灯泡都需要特别请专业维修员前来。而现在只要使用Skylift Motor，灯饰就有如升降机般可自由升降，如此一来只要是清理或更换灯泡等小问题，都可以自行解决，不需再作额外花钱请维修员上门了。

Artistic Ripple Pattern Matte Glass Wall Light

- Soft lighting
- Suitable for foyer, staircase entrance, second living room
- Adjustable brightness

艺术波纹磨砂玻璃壁灯

- 柔和灯光
- 适用于玄关、楼梯口、偏厅
- 可自行调节光亮度

After listening to the detailed explanation from Bryan, Yan Yee chose two handmade matte glass wall lights. The glass surfaces of the wall lights had artistic ripple pattern and the matte glass surface made the light softer, which were suitable to be installed at the foyer, staircase entrance and second living room. Besides, Bryan also suggested Yan Yee to install adjustable switch so that she was able to adjust the brightness according to her preference.

听取了Bryan详尽的介绍，恩仪在经过一番考量后选择了两盏磨砂玻璃面的壁灯。其玻璃面上有着艺术波纹再加上磨砂玻璃质面可令灯光看起来更加柔和，适用于玄关、楼梯口、偏厅等处。除此之外，Bryan也贴心建议恩仪可安装调节式开关，那样就可以自由调节她喜欢的明亮度了。
